### Meeting Opening

Meeting opening included: official welcome of the guests, review of meeting objectives and agenda and team introductions.

### Project review

**The next part of the meeting was devoted to project review. We discussed** what we have done in project and what is ahead. Financial monitoring procedures were explained by the lead partner (Financial monitoring will be done every 8 months). Agreements we reached about the project leaflet: Every partner will perform an inquiry among:

- 30 women 50+
- 20 parents

The results of this enquiry will be published in the brochure.

All partners will suggest questions to be included in the inquiry until 19<sup>th</sup> May.

### **Presentations of the partners organisations on statistics**

At this part of the meeting all of the partners presented information statistics and situation of 50+ women on the market. The partners had chosen different approaches towards statistics that were presented. Some of the partners, like ProActivate, Ireland and Bimec Bulgaria focused on the narrow target group of women 50+, for which unfortunately there is not so much available statistics. Other partners made a broader review of the labor market. The different approaches were regarded by the partnership as diversity and a choice of ideas. It was agreed that for the final Brochure the statistics that will be published will be uniform, based on partners decision which data should be included, but they will be prepared towards the end of the project in order to be most up-to-date.

Lead partner will suggest what type of data each partner will provide for the final brochure.

### **Presentations of the partners organisations on law regulations**

After lunch all partners presented the law regulations in their countries on becoming professional child carer. Again partners had taken different approaches in their presentations where some of them included in the presentations also regulation on professions in kindergartens and preschool institutions, while others focused only on day care by nannies. In summary the law regulation of the nanny profession is quite diverse:

- starting from this being a profession with strict requirements about training and qualification (like in Ireland);
- mixed regulation like in Czech Republic where if you work as a nanny full time it is regulated and if you work part time it is not regulated and
- and for example Bulgaria where no formal qualification is required for the profession.

Each partner will summarize the info about the law regulation in their country for the final brochure.
